

**Cancellation of the 95th International School of Hydrocarbon Measurement
May 10-13, 2021 in Oklahoma City, OK**

The Executive and General Committees of the International School of Hydrocarbon Measurement (ISHM) have been closely monitoring the continuing COVID-19 situation and the impact of such on the disposition of large public gatherings. All of us associated with ISHM hold the safety and wellbeing of our attendees, colleagues, service providers and the community as our top priority. While we looked forward to conducting another successful School in May 2021, we have determined that continuing as scheduled would be incompatible with the restrictions and constraints that so many of our participants will continue to experience for some time. Therefore, the Committees have decided to cancel ISHM scheduled for May 10-13, 2021 in Oklahoma City, OK.

We regret that the cancellation of this year's School will prevent us from conducting this premier event, meeting with friends and colleagues, and making many new acquaintances. The students, instructors and exhibitors are what have made ISHM such a tremendous success in serving the hydrocarbon measurement community since 1924, and we look forward to continuing this great tradition of providing professional continuing education that serves and benefits our students and industry in 2022.

The Committees are working on the development of several virtual training presentations to offer our students. We will communicate more information in the future regarding these opportunities.

Please send requests for refunds of the 2021 School registration fees to Leon Crowley at lcrowley1936@gmail.com or Michelle Bassham at mbassham@ou.edu.

Thank you and we wish each of you and your families the very best. We look forward to seeing you in May 2022 in Oklahoma City.

Sincerely,

The Executive and General Committees
International School of Hydrocarbon Measurement, Inc.
